

About Us

The Education Center focuses on contemporary optometric education intended to ensure the field of optometry not only continues to excel in meeting patients' primary eye health care needs but also stays atop of optometry's rapidly advancing scope of practice nationwide.

We provide education through various platforms via Optometry's Meeting®, EyeLearn and live webinars.

Our mission is to be the leader in the education delivery space by providing practical, engaging, and ongoing learning experiences for the optometric community; doctors of optometry, future doctors of optometry, and paraoptometric staff.

EDUCATION CENTER

EyeLearn offers an expanding online catalog of educational modules, webinars and resources to help advance clinical proficiencies, the practice of contemporary optometry, and practice management for doctors of optometry, future doctors of optometry, and paraoptometric staff.

ENROLL STAFF TODAY!

All paraoptometric staff of an AOA member doctor may become an AOA associate member.

PARAOPTOMETRIC CERTIFICATION

AOA CE Hours

AOA CE Hours serve to enhance the type of CE and professional development content that can be provided related to topics that don't typically fit into standard, traditional third-party requirements. This evolution allows for the AOA to expand education offerings and deliver clinical, business and communication-related topics that advance the practice of contemporary optometry. By offering CE hours, the AOA expands the concept of what CE is while still maintaining high standards for education and delivering innovative and unique content not found in other meetings and offerings. The AOA will continue to grow and adapt its education offerings so that doctors can deliver eye health and vision care to the country.
